**Low-Income Adjustment Worksheet**

If the parents’ combined monthly adjusted gross income is \$1,100.00 or more, and the monthly adjusted gross income of the parent with fewer overnights per year is less than \$1,900.00, use this calculation worksheet to determine the adjustment allowed for that parent.

**Low-income Adjustment Calculation**  
Adjusted monthly gross income of parent with fewer overnights (paying parent) from line 2  
\$ \_\_\_\_\_ minus \$1,100.00 = \$ \_ (if this total is zero or a negative number, indicate zero) plus one of the following, according to number of children:  
1 child = \$50.00      2 children = \$70.00      3 children = \$90.00  
4 children = \$110.00      5 children = \$130.00      6 or more children = \$150.00 = \$ \_\_\_\_

**Low-income adjustment amount (#5 on worksheet)      \$ \_\_\_\_\_**

If this amount is less than the amount on line 4b (on page 1) for the parent with fewer overnights per year, this parent qualifies for the Low-income Adjustment. **Enter this amount on line 5 in that parent’s column on page 1. If this number is a negative or zero, enter zero.**

### Heath Insurance Premium Calculation

If the actual amount of the health insurance premium that is attributable to the child(ren) who are the subject of this order is not available or cannot be verified, the total cost of the premium should be divided by the number of persons covered by the policy to determine a per person cost. This amount is then multiplied by the number of children who are the subject of this order and are covered by the policy. This amount is then entered on line 6c on page 1 of this form.
